**General Physics Corporation Expands Training Services to  
United Technologies Corporation**

General Physics to Provide Outsourced Training Administration

Elkridge, MD. November 18, 2003. General Physics Corporation (GP), a subsidiary of GP Strategies Corporation (NYSE: GPX), was chosen by United Technologies Corporation (UTC) to provide outsourced training management services to support UTC's Educational Assistance and Learning and Development programs.

As part of its Training Business Process Outsource solution, GP brings to UTC a suite of services that includes training administration, logistics, tuition payment, vendor payment, and stock award processing for all UTC businesses. GP supports UTC's programs utilizing a custom-developed education management application and centralized call and processing center. These services help remove purchasing and administrative responsibilities from UTC's staff by providing a single point contract with GP.

General Physics Corporation has provided training outsource services for over 15 years, and its training administration and logistics processes are ISO 9002 registered. Adherence to these processes ensures that every service, product, and process meets the highest industry standards.

About United Technologies Corporation

Based in Hartford, Conn., United Technologies Corp. (NYSE:UTX) is a diversified company that provides high technology products and support services to the commercial building and the aerospace industries through its Otis Elevator, Carrier, Chubb, UTC Power, Pratt & Whitney, Hamilton Sundstrand and Sikorsky Aircraft businesses.
